

MPG PROTECTIVE VEST

The MPG Protective Vest was designed to simulate soft body armor worn in the line of duty. It is made of lightweight, durable material for a comfortable fit for form and function.

This vest will protect torso, front and back, from direct marking round strikes. It is very streamlined to eliminate extra bulk so the student can focus on training and not what he is wearing. Adjustable side and shoulder straps allow for proper fit on all torsos.

Note: MPG Protective Vest is a recommended piece of equipment for scenario-based training.

FEATURES

- Light-weight and flexible, complete torso protection against marking-rounds.
- Wide adjustment range.
- Durable, easy-to-clean materials.
- Full freedom of movement.

Part Number - #FFVEST1 – MPG Protective Vest
